## Another Roe Anniversary - Another One Million Lives Lost

Friday, January 22, 2010

"For 37 years, half a lifetime, our great country has participated in the destruction of over 51 million human lives with the full sanction of our courts and our government," lamented Barbara Lyons, Executive Director of Wisconsin Right to Life. "It is too painful to contemplate the immeasurable hurt experienced by individuals and society as a whole caused by the unbridled killing of unborn children through abortion."

"Wisconsin Right to Life longs for the day when Americans recognize the enormity of what we are doing and cry out in a singular massive voice -- no more, no more."
